Conditions

MA.2.—

(a) transport impacts of the development, particularly to ensure safe site access;

There is an existing access currently used - there are no access implications.

(b) contamination risks in relation to the building;

No known contamination present.

No flood risk – the site is not within flood zone 2 or 3.

Above; Extract from EA mapping, showing the site is not in Flood Zone 2 or 3

(d) impacts of noise from commercial premises on the intended occupiers of the development;

There are no operations or units identified that would reasonably be considered to impact upon future residential amenity.

Should the Local Planning Authority have any residual concerns in this regard, it is anticipated that these could be appropriately addressed by way of a standard planning condition.

(e) where—

(i) the building is located in a conservation area, and

(ii) the development involves a change of use of the whole or part of the ground floor, the impact of that change of use on the character or sustainability of the conservation area;

The building is not within a Conservation Area.

(f) the provision of adequate natural light in all habitable rooms of the dwellinghouses;

All rooms have access to natural light. All units meet NDSS standards.

NA

(i) a registered nursery, or

NA

(i) where the development meets the fire risk condition, the fire safety impacts on the intended occupants of the building.

The proposal clearly meets the fire risk condition threshold without further detail.

Other considerations

NDSS

All units are NDSS compliant.
