Hi

Yes it is a secondary window but brings light into the bedroom, which is needed for a room of its size.

Also as previously stated, if this building is allowed to go ahead then the windows will be looking into our property and invading our privacy which will have views off both bedrooms and bathroom, this will be an intrusion of our privacy plus putting us into darkness.

Please note that 37 do not have any windows on the side of their house so this does not affect them.

Lastly we are still waiting for new drawings as the architect's original are incorrect and show different overall roof heights.

Regards
