Commenter Type: Member of the Public

Stance: Customer made comments in support of the Planning Application

Reasons for comment: - Design

Comments: I am writing to support the new doors that are in place. They seem to fit in with the building considering that the majority of windows are different designs and some of them being different material, I believe they look like metal frame windows and doors.

You can hardly notice the doors from the beach, as this is a top floor flat and the doors are set back.

I have read the objections posted so far and have to disagree with the comment that this block is well managed, as when you look from the beach you can clearly see that every flat has a different style window, including some balconies being enclosed. There does not seem to be any standard set for windows or doors. This block looks to be the poorer relation of the two blocks of flats next to it which seem to be kept well maintained.

So to clarify this comment is to support the doors, to bring the block updated to current modern day living standards.
