Design and Access Statement
for Replacement Doors and Side Panels
to Shoreham Baptist Church

Shoreham Baptist Church are applying for planning permission to replace our existing main entrance doors and side panels with new top quality powder coated aluminium double glazed units.

Our proposals if approved will definitely enhance the overall look of our premises and would be entirely in keeping with the existing style and design of all existing windows.

The proposed changes will include many aspects to enable easy access to the building for young and old alike.

They include:

Acc/018910
15 JUN 2010

- A low threshold that will assist
  - People using our portable wheelchair ramp
  - People who use walking frames, sticks or crutches
  - People bringing young children into the premises for our services and Playgroup activities
  - People wanting to bring infants in prams and buggies

- Pull handles for easy grip and entry to the buildings
- Concealed overhead closers
- Anti 'finger-trap' door jambs to protect children and adults from injury
- Toughened safety glass which will be internally glazed

All product, workmanship and materials are tested to British Standards and carry a full 10 year guarantee.

Our supply and fitters are a local company who are members of FENSA.

We trust this proposal will meet you agreement.
