

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

05/01/2026

1.2 Planning application reference number

AWDM/1006/25

1.3 Local planning authority (LPA)

Adur & Worthing Council

1.4 Development site address

If the site does not have an address, enter the OS grid reference.

100 Kingston Lane, Shoreham-by-Sea, West Sussex

1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

Residential blocks of three and two storeys to provide 57 no. Age restricted homes with communal lounge and office; associated parking, servicing and landscaped external amenity spaces, and green roof.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

- ☒ Yes
☐ No

4.2 If no, what earlier date did you agree with the LPA?

N/A

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

The scheme will achieve the minimum 10% requirement (21.52%) through creation of on-Site habitats which will be managed for a period of 30 years, which management and monitoring provisions specified in a Habitat Management and Monitoring Plan (HMMP). All of the creation proposed can be counted towards the BNG assessment 'in full', as per the guidance - [What you can count towards a development's biodiversity net gain - GOV.UK](#).

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

Mature trees have been retained where possible following significant consultation between the design team and project ecologist. There loss was unavoidable, replacement planting is proposed to satisfy the trading rules. Other habitats were of low distinctiveness, or of no value according to the metric, and as such their value can easily be replaced through the proposed landscape scheme.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes

☐ No

4.6 How will you achieve the target net gain percentage?

☒ On-site

☐ Off-site

☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

Creation of mixed scrub (medium distinctiveness).

Planting of individual trees (medium distinctiveness).

Installation of a 'Biodiverse Green Roof'

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

0

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

N/A

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

N/A

4.12 Do you have a habitat management and monitoring plan?

☒ Yes

☐ No

4.13 Have you used the statutory biodiversity metric tool?
