Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposal involves alterations and extensions to an existing single dwellinghouse. Under Schedule 7A of the Town and Country Planning Act 1990, householder development is expressly exempt from the mandatory BNG requirement. No Change to Site Boundary or Land Take Justification: The development is confined to the existing residential curtilage with no increase in site area or loss of undeveloped land, meaning no measurable impact on on-site habitats. No Loss of Priority Habitats Justification: The site does not contain priority habitats as defined under Section 41 of the Natural Environment and Rural Communities Act 2006; therefore, there is no biodiversity value requiring assessment or offsetting. Negligible Ecological Impact Justification: Works are limited to the existing building fabric and roof structure, with no removal of trees, hedgerows, or vegetated areas that could support biodiversity. Statutory Exemption Applies Regardless of Scale Justification: Even where physical alterations are significant (e.g. creation of a first-floor storey), the statutory exemption for householder development applies irrespective of scale, provided the use remains a single dwelling.

Note: Please read the help text for further information why developments may be exempt or not in scope.

While the principle of extension was accepted, concerns were raised regarding the scale, massing and impact of a full two-storey addition on neighbouring amenity, particularly No.25 The Heights. The scheme has since been significantly revised to address these concerns, including a reduction in height and massing, a hipped roof form, a roof cut-back/set-back from the northern boundary, the removal of overlooking windows, and revised materials, as detailed in the submitted Design & Access Statement.

- (a) a member of staff**
- (b) an elected member**
- (c) related to a member of staff**

It is an important principle of decision-making that the process is open and transparent.
