Dear Mr Peck,

Chapel of Rest, West Street, Sompting, Lancing

Re. Addition of black vertical weatherboard to cladding to north, east and west sides of building, infilling of 3no. existing windows to north side' new decking level with ground floor for flush, entrance, render to existing brick wall and pier and existing window altered to form new glazed entrance door and vertical slot window, existing canopy fascia covered with the same cladding as walls, green roof planting to canopy and flat roof rear extension, existing window replaced and height increased to east.

I/We strongly object to the above plans as they are not in keeping with the buildings and local area in West Street where we live. The proposed development will look like nothing more than a windowless plastic clad and rendered shed and a total eyesore.

Re. Halo illuminated stainless steel lettering to north and east elevations.

We think illuminated signage from either the east facing or north facing of the building is not appropriate or in keeping with the local and residential area where we live. It will also create unnecessary light pollution.

Your Sincerely,

[redacted]
