For the attention of Ms. Marie O'Keeffe:

Dear Marie,

I am surprised and disturbed that these superficially amended plans should have been uttered at all, as the purely peripheral alterations indicated address neither of the two principle concerns previously emphasised: namely, they still appear to show the residents' refuse bins in precisely the same amenity-destructive, visually offensive and health-hazardous position previously excoriated and they conspicuously fail to include the tree currently growing on the site whose retention and preservation are far more than just a token gesture in this verdure-denuded, over-developed and already excessively polluted local environment.

Thus even these amended plans embody both a substantial social nuisance and an act of ecological vandalism. If the Council is truly concerned with the responsible interests and the fundamental, long-term wellbeing of the community, they must be rejected.

Yours sincerely,

Michael Charles
