To: Louise Prew <louise.prew@adur-worthing.gov.uk>

Louise

We note the conservation officers' comments and appreciate his contribution. We note his concern with regards the loss of the section of the dwarf wall, however this section is not original and neither are the brick piers. The objective of the application is to maintain the garden and improve the access for enjoyment of the amenity space.

The proposal simply retained the brick piers in their current position, however the removal of all the piers and reversion to a more original arrangement with fence, double gates of reduced width with gates posts similar to the historic photo (fig6) and No.9 Ambrose Place front gate but wider is an alternative approach.

This approach would remove the visually heavy white picket fence and timber Arbor and tall overpowering gate and improve the street scene in accordance with the CAAD recommendations. There are alternatives and we would like the opportunity to discuss before finalising your report.

If you could give me a quick call that would be helpful.

Regards

Haydn Jones | Director
