Biodiversity Enhancement Statement

Development: Rear single-storey extension
Location: 126, Sea Lane, Goring, Worthing, BN12 4PU

Prepared: 25/07/2025
M. A. NAISH (agent for applicant)

MEASURES PROPOSED AS PART OF THE DEVELOPMENT

During the initial site preparation stage of the works measures will be taken to save all existing top soil and re-use in the existing garden to reduce impact on landfill and inprove any existing soil for improved planting options within the garden.

During and on completion of the works all existing planting within the garden will be retained and protected.

Hard landscaping ie. patio areas, will be kept to a minimum as part of the garden design and lawn/planting will form a large proportion of the scheme.

Additional planting, to include native species where possible and appropriate, will be included in the surrounding garden area.

Water butts will be incorporated as part of the scheme.
