Hi Tony,

Thank you for your email below – we are nearly there!

Condition 4 – I confirm the gate shown and annotated on drawing No: 14/934/01 received 28.10.2014 are acceptable.

Condition 5 – I have looked at the semi-vertical cycle rack by Cyclehoop and can confirm that this is acceptable in principle, but not the galvanised finish. I note they do a powder-coated colour option and black would tie in with the entrance gates, or another colour at your suggestion. Please confirm.

Condition 6 – the refuse storage shown on drawing No: 14/934/01 received 28.10.2014 is acceptable.

Condition 7 – I confirm the Rehau windows with external vertical glazing bars and traditional expressed window cills in render shown on drawings No: 14/934/01 and 02 received 28.10.2014 are acceptable.

Condition 10 – Noted and agreed.

Regards,

Jo Morin

Hi Jo,

Please find attached revised plans which cover the following.

Condition 4
Gates now annotated to be painted black and recessed 100mm.

Condition 5
If you go to www.cyclehoop.com/products then to cycle shelters and canopies then to semi vertical bike racks.

These are the only racks I can find that will fit within such a restricted site.

Condition 6

I have shown 4 x 240 litre bins and noted about collection day.

Condition 7
Please find attached details from Rehau and I have shown the vertical bars.

Condition 10
The rainwater harvester will be installed correctly as it will cause flooding if not but also it will save money to the occupants.

Should you require any further information please let me know.

Regards
Tony
