Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Reasons for comment:
- Other
- Privacy Light and Noise

Comments: In june 2017 when the original plans showed side entrance front doors i made my objections which related to issues of street scene and the fact that the impact of having access at the side where we are only 1 metre apart would affect our noise and privacy. having windows at the side i am only affected less than once per day if the windows are opened. Having a side main entrance door totally affects our privacy as neighbours and this was my objection last year. this objection was received and the plans were changed to incorporate a Front entrance door rather than side entrance door.. now at this late stage in the build when the houses are weeks from being finished an application to put main entrance to the front has now been submitted. If this work has already been started without planning permission then it is an issue for building control. my objections remain the same that i do not agree the main entrances should now be at the side. it should be the same as all of the neighbouring houses and bungalows both for street scene/ as agreed in the planning application and to save our privacy and noise
