Heritage Statement

Built in the 16th Century in Old Shoreham Village, 9 The Street is a Grade 2 Listed semi detached cottage. The property is constructed of brick and flint with a straw thatched roof on timber rafters. The windows are leaded lights in timber frames and the front of the property has black and white timber and rendered panels. There is a porch which was added at a later date.

There is a small brick built chimney 1.65M tall and 46cm wide which our kitchen extractor feeds into. There is a fault somewhere at the base of the chimney which is allowing rain to leak into our kitchen damaging our kitchen cupboards.

Our proposal is to dismantle the chimney 1metre to enable access to the rear to fix the fault which could be brick or leadwork. The chimney would be rebuilt exactly as is, using the original bricks.
