

# Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

## When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

### 1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

Building of two new residential buildings, communal parking and gardens upon a pre-existing private carpark and garden. The old, tarmac carpark will be repurposed into SuDS, private residence and green area. The old derelict private garden, along side a dismantled garage block will be repurposed into another private residence. Three tree's found on site will be increased to 9 with 6 additional, newly planted trees. In addition, new planters will be built and filled with native plants.

## 4. Biodiversity net gain strategy

### 4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

- Yes
- No

### 4.2 If no, what earlier date did you agree with the LPA?

### 4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

By adhering to the BNG metric tool (small sites)

### 4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

The site is predominantly composed of hard standing forming a car park with existing garage blocks. These areas will be partially replaced with vegetated gardens and planters. Tree's will be kept and undisturbed. Additional trees will be planted. A large SuDS plan has been implemented to help with drainage and keep soil healthy.

### 4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

- Yes

No

**4.6 How will you achieve the target net gain percentage?**

- On-site
- Off-site
- Both

**4.7 Are any of your on-site enhancements considered 'significant'?**

[Find out what counts as a significant on-site enhancement.](#)

Yes

No

**4.8 If yes, tell us about the significant on-site enhancements**

Include the appropriate planning condition or how you've secured the habitat.

The Introduction of 6 new tree's onto the site whilst non significant according to the criteria will increase biodiversity.
