Relation to other windows in the building

Survey of the windows on level on floors 1, 2, and 3 indicates that there is no common design. There is no identical design to that proposed, although flat 27 is quite similar. However elements of the proposed design are to be found in numerous other flats on the block. Specifically:

- Split into 3 separate panes
- One high-level fanlight opener

Photos of the relevant designs are shown on following pages
