To whom it may concern,

I am the owner of 84 Penhill Road. I am writing to discuss the existing UPVC window to the south elevation of my property. Whilst I would rather it wasn't there, I do not object to it as I understand there will be much more light in their bathroom. Right now this south facing window doesn't have obscure glass and completely over looks my garden. I have voiced my concern to my neighbours and they have assured me they will replace the clear glass with obscure glass. Whilst I am not objecting to the window being there I am requesting the window to be obscured as promised and as this is a bathroom window, I am also requesting that it is a closed window with just a top light opening so I can retain some of the privacy that is left in my garden. I'm sure you are aware that both properties either side of my bungalow have doubled in size in the last couple of years adversely affecting my light my privacy and external amenity. Please get in touch on the above number to discuss further.

Yours sincerely
