Hello
I would like further details about what the applicant has installed to cope with waste from the toilet and shower. The building went up very quickly in January and I would like details about what drainage has been installed as the is not shown on the details online. if inadequate drainage has been installed this would impact on our property which is behind the building. After a conversation with the female occupant earlier in the year we were informed that the building was going to be used for her hairdressing business. Confirmation that any waste is going to be diverted to the mains drains on the property is essential.
regards Fran Hughes
