Subject: 68 Slonk Hill Road

Hi

I am writing about the proposed extension of 68 Slonk Hill Road. We have received the letter about the extension being reduced to 3.5m. Our concerns are mainly the noise levels from the the property, we have heard noise from previous occupants with their televisions and sound equipment being heard in our own home as the properties are very close to one another.
We moved to this area as it is quiet and peaceful and would like this to remain, with the proposed redevelopment of the interior being changed so that the lounge being moved to the rear of the property this causes some concern as our bedroom would be adjacent to this. Should the occupant have a television or music being played we would worry about hearing this and also should we want to sell our property in the near future this might have an adverse effect on the price and a buyer.
Has the developer/buyer thought about buying a property which doesn't need to be altered to such an extent.

Yours Sincerely
A.Brand
