Dear Officer,

Application Reference: AWDM/1327/24

Location: Miller House 14 - 16 Farncombe Road Worthing West Sussex

Following your comments forwarded on 16/12/2024 regarding the drainage strategy for the above site, please find our responses below.

Query 1:

"Winter groundwater monitoring and infiltration testing must be carried out as stated in condition 11."

Query 2:

"The Drainage Strategy (red: U0532 -Rev – V1) should be updated to remove the outdated calculations using FSR data"

Response:
We have updated our drainage strategy on U0532 -Rev - V2. In it you can find the results of the BRE365 testing conducted on the location of the proposed soakaway. Please find this information enclosed on Appendix B. We have also removed the outdated calculations with FSR methodology. Now you can find only the FEH methodology as requested. We trust that this will address your concerns.

Yours sincerely,

[redacted]

Simon Arbelaez
