Proposal, Site and Surroundings

The application refers to a medium sized mature Yew near the southwest corner of the rear garden. The tree is a part of the street scene and makes a contribution to the character and visual amenities of the area.

Consent is sought to crown lift and crown thin one Yew tree T9.

The reasons for the works are primarily in the interests of safety, light issues and amenity value.

Consultations: None.

Representations: None received.

Planning Assessment

The tree is a medium sized mature Yew growing in the rear garden close to the boundary with Broadwater Hall. The tree is prominent to the area, and can be seen from many views.

The tree has a slightly northwest leaning compound stem from ground level that begins to separate into 2 main clusters from 2 metres. The stems are upright and tightly forked to 7 to 8 metres, where they begin to divide. The first laterals emerge from 3 metres, with lower foliage/epicormic growth from ground level. The main crown is dense and moderately wide spread.

The proposed works are to crown lift up to 2.5 metres and crown thin 20%. The works are to allow access beneath and allow more light and air to pass through the crown.

These works in my opinion would be relatively minor in relation to the overall size, spread and crown form of the tree and would not significantly or adversely affect its appearance, amenity value, or its contribution to the character of the area.
