Obstruction to street lighting and illuminated signs notice

West Sussex Lighting Private Finance Initiative (PFI)

THE PRESBYTERY 68
GRATWICKE RD
WORTHING

Date: 21/8/24

Ref: RMCGRATH

PLEASE CUT BACK BRANCHES AROUND LANTERN

Apparatus type: STREET LIGHTING COLUMN

Apparatus reference: L/C 1

Dear Occupier

West Sussex Council and Tay Valley Lighting (West Sussex) Limited (TVL) entered into a Contract which commenced on 1st April 2010 for the provision and maintenance of public street lighting and illuminated traffic signage within the County of West Sussex for a period of twenty five (25) years pursuant to the Government's PFI initiative. Enerveo is appointed by TVL as the Operating Subcontractor for the Contract.

Under the Terms of the Subcontract, Enerveo has an obligation to maintain the light output of street lighting apparatus in the Highway and Footway. This includes ensuring that street lighting columns and illuminated signs are clear of vegetation.

The vegetation (which may include trees or hedges) growing within the boundary of the property you occupy have grown to such an extent that they are now obstructing a street light or illuminated sign. This has the effect of preventing required illumination from the lantern and/or preventing Enerveo from completing necessary maintenance works.

the interests of safety, I should be grateful if you would arrange to remove the vegetation obstructing the lighting unit **within one month** from the date of this letter. For guidance, tree branches should clear the height of the apparatus by at least 1.6 metres. Vegetation should be cut back so that the whole column and lantern are free from obstruction. The plans printed on the reverse of this letter are for information and guidance only. For any trees which are subject to Tree Preservation Orders, notification should be provided to your local planning authority confirming your intention to prune trees in accordance with section 154 of the Highways Act.

We trust that the above is in order, however, should you wish to discuss this matter further then please call 0800 048 2435 or email westsussexpfi@enerveo.com

Yours faithfully,

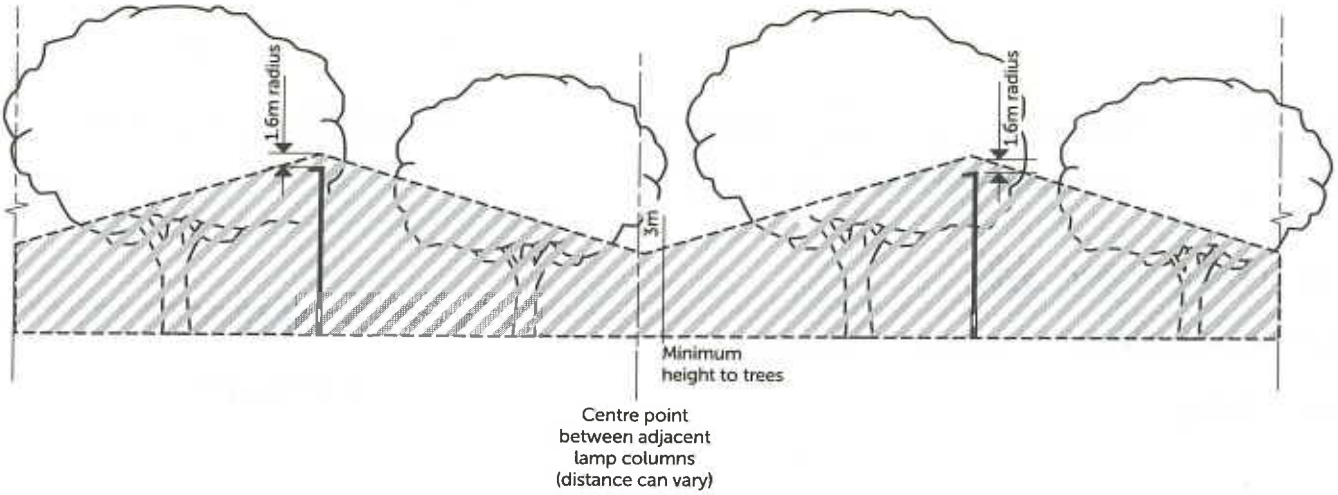

Mark Kelly, Contracts Manager
For and on behalf of Enerveo

Guidance on how vegetation should be cut back

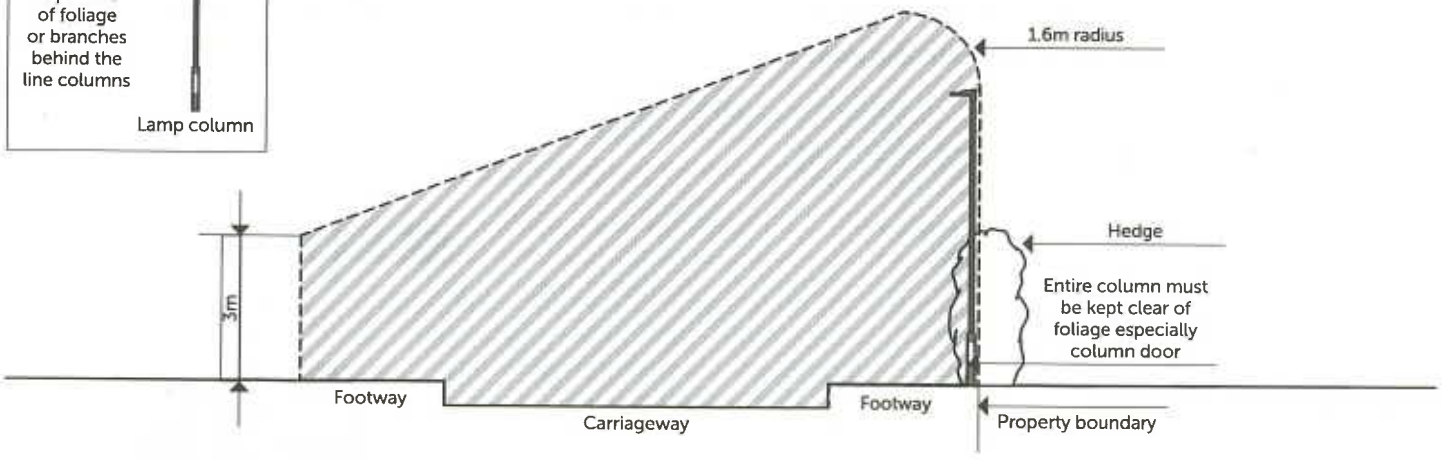

1. Remove or shorten branches interfering with street lighting to permit unobstructed illumination of the carriageway and footway to prevent any obstruction of lighting columns. Lamp to be visible from centre point between columns. Clearance to be sufficient to be effective for at least 12 months.
2. Work to conform to BS 3998: 2010, all arisings to be removed from site.

NB: Trees and shrubs should be cleared to at least 1.6m above the column and back behind the lines of the columns
