Subject: Re: AWDM/0797/25 : Co-op 8-16 S'wick Sq : New plant etc.

Good Afternoon Eve,

I apologise for the delay in getting this across to you. Please see attached the revised noise condition for the above application. Please note the other conditions regarding hours of work and illuminated signs remain unchanged.

- A Plant Noise Impact Assessment (Ref: 93078, dated:27/05/2025) was submitted in support of this application. The report includes a BS 4142:2014 noise impact assessment. The assessment concludes that noise from the proposed plant will not have an adverse impact on nearby residential receptors. I am satisfied that the report demonstrates the noise from the proposed plant and machinery will not adversely impact nearby residential amenity.

To ensure the plant achieves the levels predicted within the noise impact assessment, I recommend the following be attached to any permission granted.

Following installation of the plant and machinery the subject of this application, a test to demonstrate compliance with the criteria listed in Section 5.15 of the above mentioned report shall be undertaken before the use commences. Should this test show the criteria have not been achieved, further mitigation methods shall be implemented in order to achieve the criteria. All plant and machinery shall thereafter be maintained in accordance with manufacturers guidance and any future plant and machinery shall also meet the specified levels within the approved scheme.

Many Thanks

Hi Eve,

Nadeem wants to read through the noise assessment given the history of complaints regarding the plant noise. I will give you my full comments by the end of play tomorrow. Sorry for the delay.

Many Thanks

Hi Oliver

I trust you are keeping well.
Just dropping you a line to see if you have done the consult response to this one please?

All the best
Eve
