Subject: Planning Application Ref AWDM/0998/12

Dear Mr Barnett,

It was nice to meet you yesterday morning.

I just wanted to clarify in writing our further objection to the finish of the proposed first floor extension (Ref AWDM/0998/12) and to reiterate our deep concerns about the size of the extension and the proposed balcony.

It was unclear from the plans that we had access to that the extension was to be tile or brick hung, but of course clear on the plans that you showed us.

We believed that it would be finished in WHITE cladding of some kind. White would at least reflect the light and be in keeping with the rest of the rear of the property, as you could appreciate having visited the site.

Concerned already about the whole nature of the extension we were very shocked and upset by the proposed finish.

Grey or brown tiles or brick would be a total eyesore. This finish would further emphasise the size and incongruity of the extension absorbing light and being aesthetically ugly and unsuitable, adding to the impact of the build.

If as you suggested the plans may be amended, the nature of the finish, as well as the size of the extension and the whole question of the balcony with its impact on our privacy must be taken into consideration, if any agreement is to take place.

We look forward to hearing from you.

Yours Sincerely,

Philip and Anya Richey.
