Hi Jo,

Further to my visit to the above site on Friday 31st July 2015.

I was advised that there would be up to eight drop offs per day. Waste would be tipped inside the existing open fronted building. Subjectively, listening to the Councils bin lorries, the tipping noise i.e the material falling out of the bin was not to excessive, the banging caused by the mechanical operation, i'e the driver ensuring the compartment was empty was was loud but was a few sporadic bangs and then it stopped.

The nearest residential properties to the facility are approximately 200m away. The noise from this operation may be audible outside of these residences, but because of the distance this noise would not be excessive and given the infrequency of the operation it would not be over bearing. I would however recommend that the restricted hours on Sundays and Bank Holidays commence at 09:00hrs, to avoid the sensitive early mornings.

Regards
