Dear Mrs Hearsey

Planning ref AWDM/0824/17

We wish to comment on the above planning application as follows;
The proposal for the rear elevation of 3 Alma Street will greatly impact on our privacy and right to enjoyment of our home.
The existing small dormer window on the rear of 3 Alma Street is currently screened by a large tree which contractors have already started to cut down.
The tree provides a natural barrier and has done so for at least the 11 years that we have lived in Ivy Cottage. the removal of the tree would completely expose our property to unacceptable overlooking and the increased size, width and increased glazed area of the proposed new dormer will significantly widen the field of view from the dormer and provide unobstructed views into our garden and ground floor, 1st & 2nd floor windows.
The tree to the rear of 3 Alma St currently provides a sensible and natural privacy screen, the removal of which would also be damaging to the natural aesthetic of the area, replacing it with the eyesore of a conspicuous large extended glazed dormer outlook.
The tree provides a habitat for migrating birds which provide enjoyment, attracting birds to our gardens including breeding sparrows and enhances the natural green environment.

Therefore for the above reasons we strongly feel that the proposed new wider dormer and removal of the tree are inappropriate to the area and will unacceptably encroach on our privacy, security and right to enjoyment of our property.

Please find attached two photographs.

Yours sincerely

Richard Jones & Vanessa Parkinson
