Hi Everyone trust that you are all fit and well

I have just received a notification from Adur Council about an application to carry out some tree surgery to the trees in or along Southlands Way the reason given that the leaves / pollen /bird droppings fall on any cars parked underneath the trees.

It seems a pity that one of the attractive features of this Estate is to be reduced when it has taken 15 years for the trees to grow

I would have thought that some discussion would have taken place before the application was made and upon whose authority. The Freeholder would need to make the application. If the reason for the application is because of damage to cars by bird droppings and pollen then that could be avoided by placing a cover over the car in question. AS for Bird droppings that is a complete nonsense as there are hardly any birds on the Estate because of the seagulls and they do not perch in trees.

The trees provide substantial shade to the Estate which was badly needed during this hot summer

Richard Dyson 13 Southlands Way
