Address:	14 Victoria Road Worthing West Sussex

Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Loss of General Amenity - Other - Trees and Landscaping
Comments:	I note another application of the "forest" nursery to crown one tree and remove another tree . This is one of many applications over the 10 years I have lived here to denude this rare site of its mature, note worthy trees. This site is covered by TPO for these well developed, interesting trees as part of the Richmond Road conservation area. The trees in question are significant in that they are mature and provide a unique environment that is hard to replicate in this location. There are very few remaining mature trees in the area and reducing these trees will be a detriment to the conservation area. They provide a high amenity value to surrounding residents to reduce heat gain, as well as significant environmental value to biodiversity The trees provide habitat for a diverse range of animals and birds including bats, red spotted woodpeckers and green woodpeckers as well as long tailed tits, sparrows and doves. I object to this application.
