### Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

## Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes  
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

**Reason biodiversity net gain does not apply:**

Development subject to the de minimis exemption (development below the threshold)

**What best describes the size of your site?:**

Over 25 square metres

**Please justify the reason why biodiversity net gain does not apply:**

Biodiversity Net Gain (BNG) Exemption Statement The proposed development comprises the change of use of the existing building from a club back to its original use as a single residential dwelling. The applicant considers that the statutory Biodiversity Gain Condition does not apply for the following reasons: De Minimis Exemption The proposal is a change of use of an existing building only and does not involve any operational development that would result in the loss, degradation or alteration of onsite habitat. No priority habitats are present within the area affected by the proposal. No works are proposed that would impact more than 25 square metres of onsite habitat or more than 5 metres of linear habitat. In practice, the proposal results in no habitat loss or degradation. The existing building footprint, curtilage and external areas remain unchanged, and there are no alterations to trees, hedgerows, grassland, planting, landscaping or other ecological features. As the proposal consists solely of the reversion of an existing building from club use to its original residential use, with no measurable impact on onsite habitat, the development falls within the de minimis exemption set out in Schedule 7A of the Town and Country Planning Act 1990 and the Biodiversity Gain Requirements (Exemptions) Regulations 2024. No Change to Existing Habitat Baseline The proposal does not alter the extent, type or condition of any habitat within the site. The development therefore creates no reduction in biodiversity value and does not trigger the need for biodiversity metric calculations or a Biodiversity Gain Plan. Conclusion The proposed change of use represents the reoccupation of an existing building as a dwellinghouse and does not involve habitat loss, habitat degradation, site clearance, earthworks, landscaping changes or any other activity affecting biodiversity interests. The proposal is therefore exempt from the mandatory Biodiversity Net Gain requirements under the de minimis exemption.

Note: Please read the help text for further information why developments may be exempt or not in scope.
