Good Afternoon

With reference to the above and the information regarding this that was sent to me at my
other email address on 16th September 2026.

I wish to report that I am not in agreement with the installation of the roof lights in the
'store' as they are very close to our property, and this together with the height of the new
building feels intrusive and overlooking. Please see photo from our bedroom.

However, I am not going to request that they are removed **provided that** the sky lights on
the original plan which were meant to go on the garage (work shop) are not also installed, as
this will mean four in total on the roofs abutting our property and over looking our side. At
the end of the day this is a 'Store' has electric lighting and is not living quarters.

Kind Regards

Karen Ziaie

quarters.
