Commenter Type:	Neighbour
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	- Other
Comments:	I have lived in lancing all my life and have experience with the traveller community through school making friends with ones that were located at a static site by the airport, along with this as a local business owner they have caused me no harm and more then happy to fuel the local economy by spending, the land that is requesting for this site is a good location without any real impact to any locals, as the travelling community like to keep to themselves and want to any hassle due to the stigma that people portray on them.
