Delivery

Returns

Large enough to store up to three adult bikes, the unique patented design of the Trimetals Secure Bike Shed is great for keeping your bikes safe and secure. It's made from ultra-sturdy PVC-coated galvanised steel that's maintenance free, weather resistant and guaranteed against corrosion for 25 years, so you know it's been designed to last. For extra security, the bicycle store is designed to be bolted down to a hard surface from the inside and comes with two padlock points as standard. What's more, the spring-assisted opening action makes it easier to get the bikes in and out.

Specifications

- Rated 9/10 by Mountain Biking UK
- Stores up to three adult bikes
- Recommended by top cycle magazines
- Pvc-coated galvanised steel construction
- Spring-assisted opening action
