Re 5G MAST APPLICATION DURRINGTON TESCOS

Dear sir/madam

I object to this mast application As it will be ugly and kill vital insects. This is what is destroying bird life and bat Populations. The Corona Electrical discharge around 5 G antennae Kill small insects which are the food for many birds and bats. This is one of the reasons our birds are disappearing. It also interferes with bee direction finding abilities, Reducing their population and affecting pollination of food crops.

Please stop this environmental destruction.

Please do your homework on this devastation before you approve these devices Being installed all over our area.

Thank you, SIMONE Plaut CMIOSH MSc
