This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals which include up to 5 residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by Local Development should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available WSCC map information. A site visit can be arranged on request.

I refer to your consultation in respect of the above planning application and would provide the following comments.

The works on the highway for the new access must be agreed with the WSCC Community Highway Officer and carried out under licence. I would also require the driveway area and car parking spaces to be constructed in a bound material and that suitable drainage methods are installed to prevent private surface running onto the public highway.

I would request that visibility splays for pedestrians are present at the new point of access onto First Avenue. These should be 2 by 2 metres and should be kept free of all obstructions over 0.6 metres in height.

If the LPA are minded to approve this application a condition securing the new access and pedestrian visibility splays should be included.

INFORMATIVE
The applicant is advised to contact the Coastal Team, Community and Economic Development, Communities and Infrastructure Directorate, Centenary House, Durrington Lane, Durrington, Worthing, West Sussex BN13 2QB to obtain a license for the site access works.
