I am writing to oppose the planning at Chatsmore House.

Several attempts have been made and rejected. Ranging from two additional floors on each block to a lift and bike and bin store renovation. These have all been rejected.

Now there is planning for this current application for an additional storey in flat block 1-9.

Chatsmore House is set in lovely grounds with lots of trees and is currently a very quiet residence. Parking is a very big problem for everyone in Goring Street, the high school next door causes lots of congestion and the railway station creates lots of commuters taking the spaces on the street.

The McCarthy stone development which has recently gone up has taken away on street parking by having double yellow lines added on two parts of the road. Thats at least 6/8 less spaces. Oscar Romero has a new 6th form block with students who could also have cars, the plans stated they would have 3 additional spaces inside the school for staff and not pupils. There could be 100 6th form students many of which could be parking in Goring Street.

Having an additional storey will add to the car parking problems. Yes, we do have garages, but they were built in the 1960's and cars are now much bigger so not everyone can use their garage.

Please look at all the previous plans and refusals for Chatsmore House.

We are a lovely community who look out for each other. There are many elderly residents and families who like the quiet small occupancy of Chatsmore House 18 flats are quite sufficient.

Yours faithfully

Mrs Kelly Beldam

Flat 18 Chatsmore House

Also on behalf of

Mrs Jan Tapp
