Dear Ms Beer

Construction of Octagonal Summerhouse

67 First Avenue, Worthing, West Sussex, BN14 9NP.

Thank you for your letter dated 11th June and the information attached. I have now revised Drawing Stonewold/SB/09/01 to Revision A which now includes the following:

- 1) Scale bars for all plans and elevations.
- 2) A proposed 'Block Plan' rather than a 'Site Plan' at a scale of 1:500 is now included and shows the position of the proposed summerhouse.
- 3) Both Block Plan and Location Plan have North arrows included.
- 4) Cross section showing 'proposed summerhouse' renamed 'South elevation showing proposed new summerhouse'.
- 5) All plans and elevations are to recognised metric scales as are dimensions.
- 6) The drawings are to scale and can be scaled for planning purposes.

I have also produced a second drawing 'Stonewold/SB/09/02 which includes North, West and East elevations of the proposed summerhouse. The drawing also includes a plan of the proposed summerhouse with a north point showing the relationship to the boundary and where the windows and doors are to be located.

I have checked the Planning portal and can see no reason why paper prints are not acceptable As already stated above, the drawing submitted are to scale and can be scaled from. Sadly I do not now have access to CAD so I've had to revert to the 'old fashioned' way of doing things.

I hope I have now provided all of the information you require. I shall be having the drawings copied this afternoon and will drop them off to you either this afternoon or on Monday morning. Please don't hesitate to contact me if you require any further information.

Kind regards
