Dear Ms O' Keeffe
I am writing to ask for some clarity on the current planning application for 69 Overhill.
We received a letter dated 25th September stating that the current application was for the dormer on the South elevation. We have previously had a meeting and discussed this with Mr and Mrs Line and looked at the plans online. However today when we were chatting to Mrs Line about the new application she has informed us that **you** are still pursuing the North elevation , even though **they** have now requested the dormer to the South elevation. Please can you tell us what is going on? Are we to assume the letter we received and the current plans online are incorrect???
As we are not the applicant we can only assume that the current plan available online is the one to be considered but if this is not the current plan when will we actually be able to see the proposal?
We would appreciate your speedy response
Natalie Woodford
