Dear sirs

In addition to my previous email I attach photos of the pair of houses - my aunt's number 7 and the applicant's number 8. I should like to point out the position of the guttering and drainpipes which are below the overhang of the existing bedroom and do not appear on any of the plans either on those of the existing elevations or the proposed ones. As stated in my email any rainwater will fall on to my aunt's porch and any change to the shared drainpipe will compromise drainage for her property. It is clear in the photo that there is one shared drainpipe and this does not appear in the application.

I should like to point out finally that the extension over the porch will create the effect of a kind of tunnel which would spoil the look of the two houses and the rest of the street. I attach a photo of the neighbouring pair of houses to demonstrate this.

Thank you

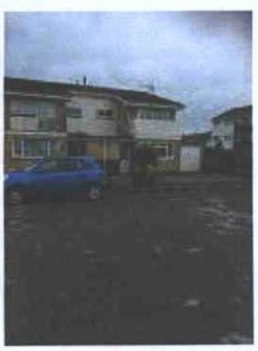

Yours faithfully

Francesca Turner
