

-
- This is a detailed architectural elevation drawing of a two-story building. The structure features a complex roofline with multiple gables and a central entrance. The building is rendered in a clean, line-art style with light blue shading for windows and a grey base for the ground. The central entrance is marked by a small gable and a set of double doors. To the left, there is a large gable and a series of windows. To the right, the building continues with more windows and a small gable. The overall design suggests a modern, multi-unit residential or commercial building.

This is a detailed architectural elevation drawing of a long, two-story building. The structure features a complex roofline with several gables of varying sizes. The facade is characterized by a series of windows: some are simple rectangular windows, while others are grouped in pairs or sets of three. A prominent feature is a large, arched entrance or window opening in the center. To the right, there is a section with a taller, more complex roof structure, possibly a tower or a large chimney, with a small window visible. The drawing uses black lines for outlines and shading to indicate depth and form. The building is set against a plain background, with a small patch of ground indicated at the base.
