WEST SUSSEX COUNTY COUNCIL **DATE: 27/11/2009**
INFRASTRUCTURE CONSULTATION

FROM: Jamie Brown **TO: Adur District Council**
FAO: Keith Morgan

SUBJECT: ADC/0364/09 -Const of det 2-bed bungalow and other works, on East side of existing bungalow (no.13)

13, Slonk Hill Road, Shoreham-by-Sea, West Sussex, BN43 6HX

CONSULTATION DATE: 03/11/2009

RECOMMENDATION:

Advice	X	**Modification**		**More Information**	
Objection		**No Objection**		**Refusal**	

S106 contribution:
TAD: £1,520

This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals which include up to 5 residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by Local Development should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available WSCC map information. A site visit can be arranged on request.

I refer to your consultation in respect of the above planning application and would provide the following comments.

In terms of parking I can confirm that the proposed level of parking does not exceed the WSCC maximum parking standard. In terms of parking layout, an adequate area of hardstanding is shown to permit turning within the site. I would recommend that cycle parking in line with the WSCC minimum standards is secured via condition; this must be secure, covered and be capable of storing at least one cycle per bedroom of the proposed dwelling. The actual details of the cycle parking facilities should be submitted to and approved by the Local Planning Authority (LPA). To accommodate cycle parking any cycle store should have minimum dimensions of 6m x 3m.

A new Access is being proposed to serve the new dwelling onto School Hill Road. The new access must not exceed 4.5metres in width. Any works on the highway must be agreed with the WSCC Local Engineer and carried out under licence. I would also require the driveway area and car parking spaces to be constructed in a bound material and that suitable drainage methods are installed to prevent private surface running onto the public highway.

The proposed crossover to access the driveway will require visibility splays of 2m for pedestrians, not shown on the proposed plans; this will require any proposed planting to be no higher than 0.6m above the ground level and any existing foliage to be maintained in order to safeguard the visibility splay.

With regard to vehicular visibility from inspection of the plans, there appears to be no apparent visibility issue at the point of access onto School Hill Road. I have also checked the most recently available verified accident records, which reveals there have been no personal injury accidents in the vicinity of the existing point of access. Evidence suggests that developments of this type are unlikely to result in increased access or safety concerns.

Section 106 Contributions

Summary of Contributions:

Net Population Increase	1.8
Net Parking Spaces	2
Net Commercial Floor Space sqm	0
Total Access (commercial only)	0.0000
Number of fire hydrants	0

Total TAD Contribution due

£1,520

The above contributions are required pursuant to s106 of the Town and Country planning Act 1990 to mitigate the impacts of the subject proposal in terms of demand on Highways and Sustainable Transport that would arise in relation to the proposed development.

Planning obligations requiring the above money is understood to accord with the Secretary of State's policy tests outlined by the in the *ODPM Circular 05/2005 Annex B*.

All TAD (Total Access Demand) contributions have been calculated in accordance with the stipulated local threshold and the methodology adopted as Supplementary Planning Guidance (SPG) in November 2003.

The calculations have been derived on the basis of an increase in 1 Net dwelling

And

The calculations have been done on the basis of an increase in an additional 2 car parking spaces.

Please see below for a Breakdown and explanation of the WSCC Contribution Calculators. Also see the attached spreadsheet for the breakdown of the calculation figures. For further explanation please see the Sussex County Council website (http://www.westsussex.gov.uk/s106).

Deed of Planning Obligations

a) As a deed of planning obligations would be required to ensure payment of the necessary financial contribution, the County Council would require the proposed development to reimburse its reasonable legal fees incurred in the preparation of the deed.

b) The deed would provide for payment of the financial contribution upon commencement of the development.

c) In order to reflect the changing costs, the deed would include arrangements for review of the financial contributions at the date the payment is made if the relevant date falls after 31st March 2010.

d) Review of the contribution towards the provision of Transport and Sustainable Infrastructure should be by reference to an appropriate index, preferably RICS BCIS All-In TPI. This figure is subject to annual review.

Recent experience suggests that where a change in contributions required in relation to a development or the necessity for indexation of financial contributions from the proposed development towards the costs of providing service infrastructure is not specifically set out within recommendations approved by committee, applicants are unlikely to agree to such provisions being included in the deed itself. Therefore, it is important that your report and recommendations should cover a possible change in requirements and the need for appropriate indexation arrangements in relation to financial contributions.

Please ensure that applicants and their agents are advised that any alteration to the housing mix, size, parking spaces, nature or tenure, may generate a different contribution requirement and thus require re-assessment of contributions. Such re-assessment should be sought as

soon as the altered figures are known and not be left until signing of the section 106 Agreement is imminent.

It should be noted that the figures quoted in this letter are based on current information and will be adhered to for 3 months. Thereafter, if they are not consolidated in a signed S106 agreement they will be subject to revision as necessary to reflect the latest information as to cost and need.

Should you require further information in relation to the calculation of the contributions, please see below:

TAD- Total Access Demand

The methodology is based on total access to and from a development. An **Infrastructure Contribution** is required in respect of each occupant or employee provided with a parking space, as they would be more likely to use the road infrastructure. The **Sustainable Transport Contribution** is required in respect of each occupant or employee not provided with a parking space which would be likely to rely on sustainable transport.

TAD = Infrastructure contribution + Sustainable Transport contribution

a) Infrastructure Contribution
Contributions for Infrastructure are determined by the net increase in car parking spaces, multiplied by WSCC's estimated cost of providing transport infrastructure per vehicle- Infrastructure cost multiplier. The Infrastructure cost multiplier as at 2008/2009 is £800 per parking space.

Infrastructure contributions = Car parking spaces x Cost multiplier.

b) Sustainable Transport Contribution
This is derived from the net car parking increase subtracted from the projected increase in occupancy of the development. The sustainable transport contribution increases where the population is greater than the parking provided. The sustainable transport figure is then multiplied by County Council's estimated costs of providing sustainable transport infrastructure cost multiplier (£400).

Sustainable transport contr. = (net car parking – occupancy) x 400

Note: occupancy is determined by projected rates per dwelling and projected people per commercial floorspace as determined by WSCC calculation figures.

If the LPA are minded to approve this application, a condition securing the new access, cycle parking and pedestrian visibility splays of 2 by 2 metres, should be included.

INFORMATVE
The applicant is advised to contact the Area Engineer, West Sussex County Council, Clapham Common, Clapham, Worthing, BN13 3UR, (Tel no: 01903 878500) to obtain formal approval from the highway authority to carry out the site access works on the public highway.
