Dear Sir

I was very surprised to see the planning application for the felling of the Cherry tree at 8 Tarmount Lane, Shoreham-by-Sea. This tree was there long before the applicants moved in and surely they were aware of it.

We have lost so many trees over the past few years and are likely to lose more due to disease so we must protect those still in good health. I worked as a volunteer at 8 Tarmount Lane for 10 years and the tree was never a problem. Indeed it is particularly beautiful when in bloom and provides a much-needed haven for the wild life. We cannot continue cutting down trees because they are a great aid against pollution.

Is this tree diseased? If not please do not allow it to be felled.

Yours sincerely

[redacted]

E Davis
