I understand that you're having problems with your online planning portals so in turn am writing to love my objections to Goring Gap co. Recent planning application as follows;

- 1 The land is designated grade 2 agricultural use and should remain as this to maintain the gap and it's natural beauty
2. It is clear that applicant has little or no respect for his application as half of it is oils appear retrospective
3. In light of his recent endeavours i would enquiring what licences and hygiene requirements have been undertaken by the local authorities
4. The ingress and egress to the proposed site is restrictive especially with vehicles parked opposite
5. Does Goring Gap recent beach signage advertising their wares form part of the application or is this another adhoc endeavour
6. What assurances if any other hat a change of use application be accepted should Goring Gap be successful with their application
7. What and how would the use of a bore hole and green energy proposal be fitter community in general
8. What are the plans for keeping the proposed sandpit in a clean and healthy condition for use in an area surrounded currently with wild life

Kind regards

Graham Humphrey
