This message was sent from outside Adur & Worthing Councils

I write to object forcefully to the planning application for this area of green space at Goring Gap.

It is detrimental to flora and fauna, will bring nothing positive to the area and will exploit ponies. It is a mess of a number of unconnected activities. The flagpole will be unsightly. Kite surfers have already object to previous plans, yet the proposal projects as positive for the community.

I believe this to be a cynical ploy to get buildings on this green space with the long term aim of getting further planning for housing. The flagpole is there to get height established for this purpose. This is a long running issue and must be prevented. Please do what is right for the environment and local community and refuse this.

Regards,

Maxine McAllister
