Hi Jo

The only thing I have got is intel from 2 neighbours that the place (no 15) may be an HMO - I have just forwarded an email from James about this.

Our action from the Intel - is to write to people and invite them to apply - we do not have the resources to visit proactively at the mo.

Obviously a converted garage is going to be a horribly insulated and unsuitable form of accommodation unless they have done it properly in compliance with building control and the email I forwarded from James' account suggests that works were recent and clandestine

best regards

Steve
