Good afternoon

I would like to register my objection to the planning application AWD/0642/26 because I believe these are not just advertising but also 4G and 5G masts. I live at the Broadwater Pub and have looked at the planning application to which there are no details as to what it actually is. I don't want my family and me put into any long term health dangers as a result of living so close to a mast if this nature.

In addition from what I can make out there is a Disabled Parking Bay directly in front of where this BT Street Hub unit will be and I am a tad concerned if it will limit the accessibility for disabled persons to this parking bay.

Already there is a lot of night light pollution from a couple of the businesses that have their lights on 24 hours a day and this will just add to it !!

I am also concerned about any noise it may emit because I have been near other hubs in Worthing town centre that make a continuous noise which you can hardly hear during the day but at night time it's very loud. Again there is already enough noise from newspaper deliveries at 4am without this hub adding to the noise pollution.

Kind regards
