RE. PLANNING APPLICATION REF. AWDM/0930/22

COMMENTS FROM MR & MRS GARSELIS, 1 SEASIDE CLOSE

As residents of No 1 Seaside Close, one of the properties most greatly affected by the Sports Hall construction, we wish to register our objection to the latest application for the following reasons.

The original Environmental Health Consultation Response queried as to why the ventilation grilles could not be positioned only on the east elevation facing away from neighbouring properties and thus minimising noise pollution. For whatever reason this was deemed unworkable and permission was granted for grilles on the western side of the building also. This we had to accept. However, the latest application sees these grilles now increased considerably in size naturally resulting in an increased noise output as demonstrated by the revised noise impact statement.

We also object to the addition of high level lighting which would of course be above fence level. We understand the need for the path around the building to be lit but why can this not be achieved by low level lights?

Original Planning Permission was granted on certain conditions being met. It is therefore disappointing to see that once approval is granted, further applications can then be made to overwrite the original constraints. How many other planning conditions will be overwritten by future applications?!
