Dear Mr Hone,

Thank you for your message and confirm ty points raised as follows,

1. According to Velux information I can find on the roof light proposed, this will project 118mm from the top face of the tiling batten, so the distance will be less than that after the depth of the tiles (about 50mm) is taken into consideration. If there are any problems with this, please get in touch and i will see if I can find out any more

2. Section B - B attached showing height of open part of the side window at 1750mm above finished floor level The window will have full obscure glazing

3. The front dormer on the section A-A should be ignored/ omitted from the application,; I did realise this and mention to your admin department , but this did not apparently filter through

Hope this is OK. Please do get in touch if anything needs further clarification

Yours Sincerely

Philip Clay

Subject: 176 Downside, Shoreham.
Dear Mr Clay,

RE: AWDM/0934/11 – 176 Downside, Shoreham.

I am looking at the revised application AWDM/0934/11 for the Lawful development Certificate for roof extensions at 176 Downside.

I am hoping to get a decision out in the next couple of days, however I would be grateful if you could confirm the following details, as there is no section drawing showing the relevant information.

i) The distance that the front roof light will project from the roof plane in which it is mounted (in mm)
ii) The proposed side window appears to be openable, please can you send a part section showing the floor levels to which it relates?
iii) Also your section A-A on drawing 1846/6 still shows the front dormer, please advise if this needs omitting from the application

Kind Regards

Carlos Hone
