This 2 story house is not in keeping with bungalows near by, The 2 story is a higher elevation than 8 St John's Avenue . The proposed development is shoe horned in position and would not be suitable to other single bungalows. Also projected by a third in front of no 8 St John's Avenue and would cause light loss to their front lounge and main bedroom. To neighbours 10, 12 ,14,18 would have their view of seafront and beach huts lessened due to obscured by extended front building line. I have been to see all our neighbours, and all have agreed to appeal this development, which also obscures privacy to 92 Marine Crescent to their rear garden. I have hand delivered comments and appeal forms signed by our local aged residents and paper copy to from no 10 St John's Avenue, to Worthing Town Hall but they have been mislaid .
