WASTE MINIMISATION STATEMENT

To accompany Planning application for conservatory extension to rear of property.

June 2009.

Job number 0811

Proposal;
To construct conservatory extension to rear of property with low brick dwarf wall in facing brick, glass walls above with UPVC frames and a polycarbonate roof with UPVC frames.

Reference to;
The intention is to appoint a contractor who will be asked to conform to the Department of Trade and Industry voluntary Code of Practice - Site Waste Management Plan – Guidance for Construction Contractors and Clients.

DEMOLITION AND SITE CLEARANCE

It is anticipated that there will be virtually no waste generated from the construction of the conservatory.

1. External concrete path hard surface areas taken up in the area of the conservatory will be washed and crushed on site to provide hardcore for the new floor slab.

2. External topsoil areas taken up the area of the conservatory will be retained on site and used in existing planter beds. There will be some external landscaping adjacent to the proposed conservatory.

CONSTRUCTION OF PROPOSED CONSERVATORY EXTENSION

1. The quantities of concrete, mortar and bricks will be specified and predetermined by the designer/manufacturer/supplier of the conservatory.

2. The conservatory itself will be manufactured off site, arriving in `kit` form for assembly on site. Any packaging/protective coverings etc will be removed by the supplier/installer of the conservatory.
