To whom it may concern

RE: OBJECTION TO AWDM/1321/23 PROPOSED PLANS & ELEVATIONS 5 DECEMBER 2023

I am writing to object to the plans submitted by 15 Wallace Avenue, Worthing BN11 5RA to change their extension and replace its roof tiles. The plan is not right, the extension they built is not like the drawing at all. If they are allowed to give an incorrect drawing showing a smaller building then the effect of changing the real larger building will be underestimated.

Apart from time away as a student I have lived here since I was 18 months old. My bedroom was always very private until they built the extension with windows in the roof. The drawing they have submitted on 5 December 2023 shows these windows as further away from my bedroom than they really are. Now my bedroom is overlooked and at the same time their extension roof light comes into my bedroom at night too.

They shouldn't have built their extension to join onto our house or to be on the shared wall as all the noise comes through the wall into my bedroom now. Downstairs this noise comes into every room now, there is no getting away from it and it has completely spoiled my enjoyment of my own home.

Downstairs is much darker now as they built their extension right up to our dining room and conservatory. There isn't the gap any more that used to let light in, they should have built it much further away like their drawing.

They built the extension wall in concrete which is horrible. It has really upset me as I love our house but if they build that wall further up like the plan then I'm always going to have to look at concrete from wherever I am in the house or garden. They didn't build the wall in brick like they were supposed to and they didn't build the wall in their garden like they were supposed to either.

I feel really crowded in now by their extension and if they build the wall higher that feeling will be increased a lot. The extension they built has taken away my privacy, taken away natural light, and brought much more noise and artificial light into my home. It has really spoilt things for me, when I lived away from home I didn't have any of those things and the thought that they could increase these things is really upsetting.

If they had built the extension like the drawing shows I wouldn't experience these negative things as much as they would be further away. Also, if the plan to build up the wall into a parapet was for a building further away like the drawing then these things would not be increased so much. I object to the false plans submitted and think that if the building was done as the drawing shows they wouldn't have damage to their extension. It's been an eyesore all the time, getting worse with adjustments, a builder shouldn't have built a bad building in the first place.

They shouldn't be allowed to try and mend their bad building with increasing the horrible wall, or allowed to submit a drawing that is not real. Even though the drawing in the first plan isn't real either it is not so intrusive or nasty to look at but the amended drawing with a parapet makes an awful situation even worse. Just looking out my bedroom window I can see the plan is false, changing the building doesn't make it better, the whole thing should be knocked down. If they want to rebuild it, it should be done properly, look nice and not be so overbearing with light, noise, lack of privacy and a tall ugly wall touching my house.

Please don't let them change our house even more to be worse, please don't let them have planning permission.

Thank you in advance.
Yours sincerely

Thea Langley
By email and I'm recorded on the electoral roll and council tax as living here
