Comments Details

	Reading between the lines of the CMP, it looks like there will be a mobile crusher brought on site to recycle hardcore for reuse in the development. Crushers should be operated in accordance with their environmental permit and stockpiles of crushed material should be managed to control dust until ready for use.
Comments:	I would recommend that the crusher and stockpiles are sited as far away from neighbouring properties as possible and thought be given in advance to where on the sight this will be so there is no double handling of the material.

Kind regards
